See: Boston armHard, swollen arm caused by lymphedema after mastectomy. Transport angle. A colloquial term for musculospiral paralysis. Medical dictionary, © 2009 Farlex and Partners (ahrm) [TA] 1. A specific and positioned extension of a removable partial prosthesis picture. 2. In technical language and writing, avoid using this word in the colloquial sense of 'superior limb'. The upper limb segment between shoulder and elbow.3. An anatomical extension similar to an arm. [L. armus, antequator of an animal; G. Harmos, articulated shoulder] Medical dictionary for dental professions © Farlex 2012Q. I have constant pain in the inner part of my arm. What can that be? I've noticed in the last few weeks that I have a right arm pain. The strange thing is that pain is at one pointin the inner part of the arm, very close to the elbow. Pain first started during baseballBut I'm not sure. I work in a factory and sad before using the right arm for baseball, and this pain hinders me. What can that be? A. I play a lot like a pitcher myself, and I have the same pain. It is more painful when the forearm is flexed towards the body. I went to my doctor because he drove me crazy, and he said I need to take anti-inflammatory drugs, and if it doesn't work, it'll inject me with something. He prescribed me a great medication and I didn't need the injection. Q. I developed an AV Fistula after a cardiac flushing procedure. I'm bleeding through the tissues in the left arm are on coumadine, but currently they have an INR less than usual. Corrective surgery was scheduled for yesterday, but it had to be delayed. I'm worried that I have a great amount of blood (dark redness) bleeding even though the tissues right under the skin in my left arm. Should I look for immediate medical attention? Hemorrhage is more than a 3 1/2" area on the left arm. He came in a few minutes. A. Well, you're on bloodshed. I wouldn't risk it. I'm not sure I'm following what's going on over there. It could be a serious problem or nothing. I want a doctor to check it out. The worst thing that could happen is to waste a day at the hospital, the other head of that scenario, can end up dead. I'd go with the first. Q. My son shows a behavior like hooting, screeching, lembbite arms, "chicken" dance, rocking... Hi, members, please help me choose the right way. My son shows behaviors such as hooting, screeching, flying arms, dancing "chicken", rocking, bouncing, jumping, limited repetitive game skills, low self esteem, difficulty comminiciating and occasionally supporting adult direct tasks, the difficulty of maintaining relationships with adults and peers,easily frustrated and will become physically and verbally aggressive, it can react to be touched, easily twisted, easily unwinded, easily unwinded by noise, careful, disloyal and it difficult to change tasks, difficulty listening and difficulty following the verbal instructions. He's home and school. I was told by the local nhs group that is not autistic because of the separation and divorce of his parents in his early life and does not present these behaviors as a "pervasive characteristic." instead suggest that he needs auditor and has "neuro immaturity of development." what is your opinion? Should I have a second opinion? r. If you ask me, they might be right. Anyway, I'd be careful with the diagnosis of over-the-net, their specialist saw the child and examined his behavior, he probably knows what he's doing, and even if you are not sure, get a second opinion. Can't hurt us? Further discussions on armthis content is provided by imedix and is subject to imedix terms. questions and answers are not approved or recommended and are made available by patients, not doctors.
